

Problem of the Week

Problem B

Bookity-Book!

Patrick is reading a book about forest animals. He has read $\frac{3}{4}$ of the 100 pages in his book. Nicholas has read $\frac{2}{3}$ of the 120 pages of his book about alpine flowers.

- Who has more pages left to read in his book?
- To finish his book, Patrick reads five full pages per day, every day. If Nicholas also reads a certain number of full pages every day, how many pages per day must he read in order to finish his book on the same day as Patrick finishes?
